FACILITATOR GUIDE

Fire, Frequency & Flame

Working with Candles Metaphysically

MILA'S HEALING TOUCH

Format: LIVE on Zoom

Duration: ~2 hours (12 modules)

Price: $111 live / $77 replay

Attendee materials: 1 candle, lighter/matches, journal, optional crystal/oil

MILA'S EYES ONLY

AT A GLANCE

Workshop Timing Overview

MODULE	TOPIC	TIME
1	The Metaphysical Power of Fire	10 min
2	What a Candle Really Does Energetically	10 min
3	The Scientific / Physical Side	10 min
4	How to Read Candle Flames	15 min
5	Wax, Drips, Soot & Shapes	15 min
6	Candle Colours, Frequency & Vibration	15 min
7	How to Choose the Right Candle	5 min
8	Types of Candles & Metaphysical Use	10 min
9	How to Prepare a Candle Energetically	10 min
10	Simple Candle Ritual - LIVE Practice	15 min
11	Spiritual Discernment	5 min
12	Fire Safety	5 min
Total Workshop Time		**~2 hours**

REMINDER - ATTENDEE MATERIALS

Ask everyone to have ready: **1 candle (any colour), lighter/matches, journal, optional crystal or oil, quiet space**

MODULE 1

The Metaphysical Power of Fire

10 Minutes

- Fire is the element of **transformation, alchemy, action, purification**
- Also represents: **passion, power, will, spirit, illumination, rebirth**
- Fire destroys the old and activates the new
- Energetic uses: clearing stagnant energy, prayer, manifestation, protection, ancestral connection, grief and release, emotional healing, intention setting, chakra work, meditation

> **SAY THIS**
>
> *"Fire is one of the most active and transformative elements. Water feels. Earth grounds. Air moves thought. But fire changes things. Fire does not leave things the same."*

→ *"Now that we understand fire as an element, let's look at what happens when we put that energy into a candle..."*

MODULE 2

What a Candle Really Does Energetically

10 Minutes

A CANDLE ACTS AS:

- Focus point for consciousness
- Carrier for intention
- Symbolic offering
- Spiritual anchor
- Transformational portal
- Visual mirror of movement and resistance

> **SAY THIS**
>
> *"A candle is not magic by itself. The power is not in the wax alone - the power is in the consciousness, intention, energy, prayer, frequency, and the relationship between you and what you are calling in or releasing."*

WHEN YOU LIGHT WITH INTENTION, YOU ARE:

- Directing focus
- Creating ritual space
- Anchoring thought into form
- Using symbolic action to move subconscious energy
- Giving the mind-body-spirit a clear energetic message

→ *"Let's look at what's actually happening physically when a candle burns - because even the science is a metaphor for transformation..."*

MODULE 3

The Scientific / Physical Side of Candles

10 Minutes

WHAT PHYSICALLY HAPPENS:

- Flame melts wax → liquid travels up wick → heat vaporises wax → vapour reacts with oxygen → creates flame
- Basic combustion: **fuel + heat + oxygen = heat and light**
- Flames move due to convection

> **SAY THIS**
>
> *"Even physically, the candle is a perfect metaphor for transformation. The solid becomes liquid. The liquid becomes vapour. The vapour becomes flame. Spiritually, this mirrors what happens in healing: what is dense begins to soften, move, release, and transform."*

WHY FLAMES MOVE:

- **Physical:** air currents, drafts, uneven wick, impurities, moisture
- **Metaphysical:** energetic activity, emotional resistance, spirit communication, clearing in progress

> **KEY LINE**
>
> *"Not every dancing flame means spirit is talking. Sometimes your AC vent is talking. We have to learn how to hold both truths: the physical world and the energetic world. Discernment is spiritual maturity."*

→ *"So with that discernment in mind, let's learn the language of candle flames..."*

MODULE 4

How to Read Candle Flames Metaphysically

15 Minutes

OPEN WITH

"Candle reading is symbolic language. It is not about fear, obsession, or rigid rules. It is about noticing patterns, energy, and intuitive messages."

- **Strong, steady flame** - aligned energy, clear intention, strong spiritual support. *"The path is clear. Energy is stable."*
- **Tall flame** - strong energy, heightened spiritual activity, amplified intention. *"This work is active."* (Physical: wick too long / too much fuel)
- **Small or weak flame** - low momentum, fatigue, resistance, blocked intention. *"The energy may need more clarity, support, or clearing."* (Physical: short wick, poor oxygen)
- **Flickering or dancing** - energetic movement, spiritual communication, resistance shifting. *"Something is moving."* (Physical: airflow)
- **Popping or crackling** - emotional charge, resistance, release of tension. *"Something wants to be heard."* (Physical: trapped moisture, debris)
- **Flame going out** - resistance, timing not aligned, spiritual pause, redirection

SAY THIS

"A candle going out is not automatically a curse, attack, or doom. Sometimes it means pause. Sometimes it means clear first. Sometimes it means the work needs to be approached differently."

→ *"The flame is one message - but the wax tells its own story too. Let's look at what the wax, drips, and soot are showing us..."*

MODULE 5

The Wax, Drips, Soot & Shapes

15 Minutes

WAX REPRESENTS:

Emotional residue, energetic discharge, subconscious material, how energy is being processed

- **Burns clean** - smooth energy flow, aligned intention, minimal resistance
- **Excessive dripping** - emotional overflow, unresolved heaviness, grief, release in progress
- **Heavy to one side** - imbalance, internal conflict
  Left = receiving, feminine, subconscious, past
  Right = action, masculine, conscious, future

  (Teach as symbolic, not dogma)

WAX SHAPES - ASK: "WHAT DOES THIS REMIND ME OF?"

- **Heart** = love, healing, heart chakra
- **Spiral** = cycle, evolution, energy movement
- **Tears/drops** = grief, emotional release
- **Snake** = transformation, shedding
- **Flower** = opening, heart expansion
- **Cross/X** = crossroads, ending, divine support
- **Circle** = completion, protection, wholeness
- **Mountain** = obstacle, strength building
- **Face/figure** = spirit symbolism, ancestral message

> SAY THIS
>
> *"Wax shapes are not always literal prophecy. They are often symbolic mirrors for the subconscious and energetic field."*

BLACK SOOT/SMOKE:

Dense energy clearing, emotional heaviness, resistance, stagnant patterns releasing.

MODULE 6

Candle Colours, Frequency & Vibration

15 Minutes

OPEN WITH

"When we talk about colour frequency spiritually, we are also borrowing from the truth that colour is literally vibration in the visible spectrum. Does a red candle automatically change your life because of nanometers? No. But colour absolutely affects human perception, emotional response, symbolism, and energetic intention."

COLOUR	USE FOR	FEEL
White	Healing, blessings, angelic work, general spiritual support	Clear, pure, spacious
Black	Clearing, cord cutting, release, boundary setting	Dense, grounding, protective
Red	Motivation, grounding, empowerment, physical energy	Strong, activating, embodied
Orange	Inspiration, confidence, emotional healing, creative work	Warm, flowing, expressive
Yellow	Decision-making, mental clarity, self-worth, learning	Bright, alert, mentally activating
Green	Emotional healing, prosperity, physical healing, harmony	Balanced, restorative, nurturing
Pink	Inner child work, heart healing, relationships, self-worth	Soft, loving, receptive
Blue	Speaking truth, conflict resolution, prayer, anxiety support	Cooling, truthful, calming
Purple	Meditation, spiritual connection, intuitive development	Mystical, elevated, inward
Gold	Prosperity, divine alignment, confidence, manifestation	Radiant, expansive, empowered
Silver	Moon rituals, dream work, emotional healing, inner wisdom	Reflective, intuitive, receptive

→ *"So now you understand the energy of colour - next, how do you actually choose the right candle for your purpose?"*

MODULE 7

How to Choose the Right Candle

5 Minutes

THREE QUESTIONS TO ASK:

- **1. Intention** - What am I calling in? What am I releasing? What support do I need?
- **2. Colour** - Match the colour to your energetic purpose (refer back to colour chart)
- **3. Candle shape/type** - Match the form to your ritual type (covered next)

> **TEACHING NOTE**
>
> *Keep this simple and practical. It is three steps - intention, colour, form. That's all they need to remember.*

→ *"Let's look at the different types of candles and when to use each one..."*

MODULE 8

Types of Candles & Their Metaphysical Use

10 Minutes

- **Tea lights** - simple intention work, daily prayer, quick energetic focus
- **Chime candles** - focused rituals, specific intentions, chakra or spell work
- **Pillar candles** - long-term intentions, strong energetic anchoring, altar work
- **Jar/novena candles** - prayer, devotional work, consistency, protection and healing
- **Figure candles** (optional) - symbolic work, relationship healing, ancestral/intention rituals

> SAY THIS
>
> *"The candle form helps shape the focus of the work. The more specific the symbolism, the more directed the subconscious and energetic field become."*

→ *"Now that you know how to choose your candle, let me show you how to prepare it energetically before you light it..."*

MODULE 9

How to Prepare a Candle Energetically

10 Minutes

- **Step 1 - Cleanse:** prayer, breath, smoke cleansing, sound, intention, Reiki/energy work, holding in hands
- **Step 2 - Program:** hold the candle, state what it is for, what you're releasing, what you're calling in, what you're asking Spirit/God/Source to support
- **Step 3 - Optional anointing:** anoint top down for release, bottom up for drawing in. Toward you = calling in, away from you = releasing

SAY THIS

"You are not just lighting wax. You are imprinting consciousness into form."

DEMO NOW

Pick up your candle and show them each step live. Hold the candle, speak an intention out loud, demonstrate the anointing direction (top down / bottom up).

→ *"Now we're going to do this together. Everyone grab your candle - we're about to do a live healing and release ritual..."*

MODULE 10

Simple Candle Ritual - LIVE Practice

15 Minutes

PRACTICE EXERCISE - LEAD THEM THROUGH THIS

Healing & Release Candle Ritual

Materials: 1 candle, lighter/matches, paper/journal, optional crystal, optional oil, quiet space

- **1. Ground** - "Take a few deep breaths. Hand on heart."
- **2. Set intention** - "Ask yourself: What am I ready to release? What am I ready to call in?"
- **3. Speak your prayer** - Lead them through this prayer:

LEAD THIS PRAYER

"I ask that this candle support the release of all energy, emotion, thought patterns, beliefs, and attachments that are no longer in alignment with my highest good. I call in healing, clarity, peace, truth, and divine support."

- **4. Light consciously** - Lead them:

SAY THIS AS THEY LIGHT

"As this flame burns, may all that no longer serves me be transmuted into light."

- **5. Sit with the flame** - "Observe what you feel. Emotions, thoughts, body sensations. Watch what the candle does."
- **6. Close with gratitude** - Lead them:

CLOSING WORDS

"Thank you for what has been revealed, cleared, and transformed."

→ *"Before we close, I want to share something important about discernment..."*

MODULE 11

Spiritual Discernment

5 Minutes

CANDLES ARE TOOLS, NOT REPLACEMENTS FOR:

- Nervous system regulation
- Trauma healing
- Therapy
- Medical care
- Emotional responsibility
- Practical action

> **SAY THIS**
>
> *"A candle can support your healing, but it is not here to bypass your healing. Ritual should deepen your awareness - not replace your inner work."*

→ *"And finally - because we are working with fire - let's talk about safety..."*

MODULE 12

Fire Safety & Workshop Close

5 Minutes

SAFETY REMINDERS (READ THROUGH QUICKLY):

- Never leave a candle unattended
- Keep away from curtains, paper, pets, children, loose fabric
- Stable, heat-safe surface
- Trim wick to 1/4 inch before use
- Avoid heavy drafts
- Don't burn too long
- Discernment with herbs, oils, dressings
- Extinguish consciously and safely

SAY THIS

"We honour the element of fire by respecting it."

Workshop Closing

CLOSING SCRIPT - READ SLOWLY

"Candles remind us that light is not passive. Light reveals. Light warms. Light transforms. When we work with candles consciously, we are entering into sacred relationship with intention, energy, symbolism, and Spirit. The candle is not just burning wax. It is showing us where energy is moving, where healing is happening, and where consciousness is ready to rise."

AFTER CLOSING

Thank them for being here. Mention the workbook they will receive. Open for Q&A if time allows. Remind them of the replay and MilasHealingTouch.com
