SECTION 01

# What is Manual Muscle Testing?

*A communication bridge between your conscious mind, your subconscious mind, your higher self, and your intuition*

> *"Manual muscle testing is a way of receiving feedback from your nervous system, from your subconscious mind, from your energetic field, from the consciousness that is around you."*
>
> - MILA VELAZQUEZ

Manual muscle testing allows us to speak to our own bodies, keeping our ego out of the way, our logical mind out of the way. We put that reasoning, logical mind to the side and we use our intuitions.

We use our bodies to show whether something is strong, congruent, or aligned - or if there is a misalignment, a stress, a weakness, an incongruence in your body.

### YOUR BODY RESPONDS TO EVERYTHING

Your thoughts, your emotions, your beliefs, your frequencies, your memories, the environment, the people around you, supplements that you hold in your hand, energetic imbalances. Your body is taking all of that information in and it is able to respond back.

### THE BIGGER GOAL

This is all in the hopes of getting your intuition so good that you don't have to manually muscle test it. You already know. You know what you know without knowing why you know it.

### THE MIND + BODY CONNECTION

Your subconscious remembers every memory that you've had - it's a program that doesn't stop running. Your higher self is like the librarian of the Akashic Records - it knows everything in that field. And your conscious brain doesn't want to stop thinking and creating some kind of story for you. Manual muscle testing connects you to all three.

*What does "knowing without knowing why you know it" mean to me?*

SECTION 02

# Before You Begin

*Energy flow, alignment, and the conditions for accurate testing*

### THE CROWN CHAKRA CONNECTION

Manual muscle testing will not work if your energy is not flowing. If you're not connected to the divine, if that crown chakra has a stopper on it, there is no connection to your higher self in that quantum field. It's imperative that energy flows through all of your chakras, especially your crown, so that you can get that information in.

## WHAT YOU NEED TO BE

**Grounded**

You need to be grounded. If your cortisol has kicked off, don't bother asking any questions. You have to be aligned, centred, in order to receive information.

**Neutral**

You don't care what the answer is. You don't put an attachment to it. The minute that you're putting an attachment to something, you're done. Your ego gets in the way.

**Hydrated**

Drink water. You need to be hydrated. If you're getting the same response for true and false, you might just be thirsty.

**Present**

No bias, no wishful thinking, no projecting, no anxiety, and not in someone else's energies altogether. Be in peace in order to really connect to your higher self.

> *"When I started doing this, I used to run into my bathroom, I'd put on a candle, I would turn off the lights, the kids weren't allowed in. Two doors were locked. And I would have to do some breathing, centre, ground. I would put my logical reasoning mind aside, so that that intuition can come through."*
>
> - MILA VELAZQUEZ

### WHEN IT WON'T WORK WELL

If you're tired, it doesn't work very well. If you're emotional, it doesn't work very well. If you're very emotional that day, don't even bother asking questions - you're not going to get the right answers. If you have interference from other things around you, it's not going to work. You can't be in fear, you can't be in worry.

*What does my sacred space for testing look like?*

SECTION 03

# Connecting & Setting Your Intention

*You always want to start with an intent*

## HOW MILA CONNECTS

1. Sit for a little bit by yourself. Take a few deep breaths.
2. Imagine surrounding yourself in a white light of protection, your heart centred.
3. Ask to connect to your higher self, to your highest truth, to that conscious field.
4. Set the intention: for the purpose of receiving clear, accurate, and loving information for your highest and greatest good.
5. Connect to your angels, your spirits, your guide, your guardian angel, source - whoever you feel connected to.
6. Ask that your ego, your opinions are kept out of the way.

## ASKING THE RIGHT QUESTIONS

Questions should be concise, direct, precise. The more specific you are, the better your answers will be.

### VAGUE QUESTION

"Should I go on vacation?"

Well, sure you should. Why not? - That's too broad to get a useful answer.

### SPECIFIC QUESTIONS

"Is it for my highest and greatest good to go on vacation?"

"Is it for my highest and greatest good to go on vacation in July?"

"Is it for my highest and greatest good to go to Florida? In August?"

### TRUST WHAT YOU GET

Trust what you get is what you get instead of asking the same question different ways and seeing if you get a different answer. What you get is what you get - with no questions.

*My intention for learning manual muscle testing:*

METHOD 01

# The Sway Test

*The easiest way to start - a human pendulum*

## HOW TO DO IT

1. Stand up. Take a few deep breaths. Relax your arms by your side. Clear your mind.
2. Deep breath in through your nose, out through your mouth.
3. Say "My name is [your name]" and see which way your body goes. It's a very subtle motion.
4. Then say something that's false - "My name is Henrietta" - and notice the opposite direction.
5. Test with more questions you already know the answer to: "I live in [city]," "I have [number] kids." Say some things that are true and some that are false, just to check which way you're going.

**Important:** Sometimes a yes is forward and no is back. Some people are opposite. Some people go side to side. This is why we always want to get a baseline before we start.

↑ FORWARD = YES

↓ BACKWARD = NO

Stand loose - it's a very gentle, subtle motion

### SEATED SWAY

You can do this in a seated position if you can't stand. It's a little bit harder, but it works.

### PRACTICAL USES

If you're using supplements, you hold the supplements and you can ask, "Is this for my highest and greatest good?" and see which way you go. You won't be knocked off your feet - you'll just gently be pulled. There is no thinking behind it at all.

*My sway test baseline: My YES direction is _____ My NO direction is _____*

METHOD 02

# The Pendulum

*Anything that's hanging on a string - you can make your own*

## HOW TO USE IT

1. Hold the pendulum any way you want. Mila holds it up so people can see.
2. Ask "Show me my yes" - it will swing in one direction (forward/back, circle, etc.).
3. Ask "Show me my no" - it will show a different motion.
4. Ask "Show me none of my business" - you'll get a third response (for Mila, counterclockwise).
5. You can even ask for a "jumping yes" - a big, emphatic response.

**Your arm will move.** That's because your nerves are firing to keep your shoulder up and your elbow flexed while holding the pendulum. Your arm is going to move because you're holding the pendulum in your hand and your fingers are firing. That's normal.

It can go forward/back
It can circle
It can go diagonal
It can stand still

### WHY MILA DOESN'T USE IT IN SESSIONS

"I don't use it when I work because this is very slow to do with someone, you know, when asking questions. I'm impatient and I got to get in and I got to get out. But I do use my pendulum for other metaphysical things like clearing energy."

### CROSS-CHECK YOUR METHODS

You can always use the pendulum against your sway test. If you do the sway test, you can check it against the pendulum. Same principle - you hold it, you relax your hands, there's no thought about it, you calibrate, then you ask questions.

*My pendulum signals: YES = _____ NO = _____ None of my business = _____*

METHOD 03

# Two-Handed Methods

*The O-Ring, the hole-in-one, and the duck*

## THE O-RING (RING AND RING)

The hardest method to do, according to Mila. Make two rings with your fingers. One hand is the holder, one is the puller.

- Hold them nice and gentle - it's not a death grip
- Decide which hand holds, which pulls
- Put them inside together, ask a question
- **True:** fingers stay strong
- **False:** fingers open up

It's very gentle - you don't pull for dear life.

## THE HOLE-IN-ONE

Mila's preferred two-handed method because it's multifaceted - you can use it in any position, with any finger.

- Make a hole with one hand (thumb + finger)
- Put one finger from your other hand through it
- Whatever finger you feel like putting in
- **True:** stays strong
- **False:** goes weak

You can hold it any way - thumb and finger, different positions. Very versatile.

## THE DUCK METHOD

"I don't prefer the duck. You make a duck with a duck, and you ask a question. I don't like this one. This one takes too much of my time and space and my fingers." - Mila demonstrates it but doesn't recommend it.

## MILA'S TIP ON SWITCHING METHODS

"I use different types depending on which finger is hurting. Arthritis. So depending on where I am, if I'm underneath my desk and I get tired, I'll do these to test. Then I'll do these. When I get tired, I go to the one hand."

> *Which two-handed method feels most natural to me?*

METHOD 04

# One-Handed Methods

*The flick, the roll, the snap, and finger-over-finger*

Mila recommends learning one-handed methods because "the one-handed comes in handy." There are plenty of options.

## THE FLICK METHOD

**MILA'S FAVOURITE - THE ONE SHE USES TO WORK ALL THE TIME**

You can use whatever finger you feel like. Mila uses her index finger or her third finger with her thumb.

- **True:** hold strong (smooth flick)
- **False:** go weak (can't flick cleanly)

"I know a therapist - she uses her pinky. That's the only thing she uses, and she is fast with that freaking finger. I wouldn't use the pinky, but to each his own."

## THE ROLL METHOD

Hold one finger on top of the other, and one starts to move - a rolling motion.

- **Congruent:** it easily moves, continues to roll
- **Non-congruent:** it will get gritty - it just doesn't go

"This is a really good one." - Mila

## THE SNAP TEST

If it's a yes, you snap easily. If it's a no, it gets caught.

- **True:** clean snap
- **False:** fingers catch / stick

"This is not one that I prefer to use. I catch myself making mistakes with the snap test because I really like to snap my fingers." - Mila

## FINGER-OVER-FINGER

One finger stabilises on the bottom. Your index finger presses down on top.

- **True:** press down, stay strong
- **False:** go weak

"To me, this is very hard to do. My fingers don't want to go in this direction. But people that do this, they do this like so quick." - Mila

### ALSO POSSIBLE: WRIST AND BICEP TESTING

You can manual muscle test on the wrist - Mila says "this is not a muscle that I like, but you can." You can also test on your biceps muscle, or on somebody else's biceps. For testing on someone else, you will normally use their shoulder muscle because it's a stronger muscle.

> *Which one-handed method am I going to practise first?*

METHOD 05

# Mouth Methods

*Mila's least favourite - but useful when you need to be inconspicuous*

"This is my least favourite. Because, look, you can see that you're making funny faces. And if you want to be inconspicuous, you don't want to use your lips or your tongue." - But they absolutely work.

## TONGUE CLOCKING

You clock with your tongue along the roof of your mouth.

- **Yes:** a strong clock - smooth movement
- **No:** it gets stuck in the roof of your mouth

## LIP PURSING

You purse your lips together.

- **Yes:** you can easily purse your lips
- **No:** it goes into a funky shape - it's not a pursing

## THE SWALLOW METHOD

Mila's pick of the mouth methods for being truly inconspicuous.

- **Yes:** you can easily swallow
- **No:** you can't swallow - no way

"Sometimes, inconspicuously, if I have a real question and you have enough saliva in your mouth, the swallow method works very well. Nobody can tell what you're doing. You're still standing there smiling."

### "NONE OF MY BUSINESS" - THE THIRD RESPONSE

Sometimes when Mila doesn't move anywhere and just stands there, she asks, "Is it none of your business?" And she gets a yes. If she just stands there and doesn't move - not right, not left - she knows it's none of her business. Some things you're not meant to know. With the pendulum, "none of my business" goes counterclockwise for Mila.

### MILA'S ADVICE ON METHODS

"If you know one or two, it's great. Use them interchangeably. I think that if you know how to do the sway test and the pendulum, you find your favourite hand positioning - whether it's one-handed or two-handed - that's all you need."

*My top two methods to practise:*

SECTION 04

# Permission & Ethics

*Without someone's permission, you can't get into their energy field*

### THE CORE RULE

"Are you there to snoop around in somebody else's business? It doesn't work that way. Because without someone's permission, you can't get into their energy field. You'll get bogus answers."

## MILA'S PERMISSION RULES

- [ ] If you're working on someone else, you have to ask their permission first
- [ ] You can't just use your free will - there are energetic boundaries and spiritual boundaries that we hold
- [ ] If it's an animal, you have to ask permission of the owner
- [ ] If a puppy just gave birth, you have to ask the mother dog for permission - not just the human owner
- [ ] Same with a horse, cat, whoever
- [ ] You can ask yourself what you think about someone, what your higher self thinks about them - but you cannot ask them what they think, without their permission
- [ ] You can't be snooping in somebody else's business

## TESTING ON ANOTHER PERSON

When you manually muscle test on someone else, there are important requirements:

### YOUR JOB (THE TESTER)

Your job and your only job is to ask the question and manually muscle test. You use the shoulder muscle normally, because it's a stronger muscle. You stabilise the shoulder, put the arm on, and give pressure.

### THEIR JOB (THE PERSON BEING TESTED)

The other person's job is to match your pressure. Not to anticipate, but to match the pressure that you're giving them. If it's true, the arm will stay strong. If it's false, the arm will go weak.

### MAKE SURE THEY'RE READY

You have to make sure that they're in the clear, that they're switched on, that there's no issues in their energy field. That they're hydrated, that they've used the bathroom. You can switch arms - right arm or left arm, it makes no difference.

> *How will I approach permission when testing for others?*

SECTION 05

# Proxy & Surrogate Testing

*It's energy - that has no space, no time, no distance*

If you have someone that you cannot manually muscle test on, like a child or an animal, you will create a surrogate for that child and that animal. You will connect two people together, because it's energy - that has no space, no time, no distance - and with your intention.

## HOW SURROGATE TESTING WORKS - MILA'S EXAMPLE

1. If Mila was going to test Grace, and she was going to use Chris to be the tester for Grace - she would ask Chris to pull out her arm and say her name. Chris should hold strong, because her name is Chris.
2. Mila's intention is that Chris is going to serve as a surrogate for Grace - and she hooks those two energies together. They hold hands.
3. When Mila asks Chris's name, Chris goes weak for "Chris" and stays strong for "Grace." That's how we know the connection is made.
4. Then Mila asks the questions and manually muscle tests Chris for Grace.

> *"It's the same principle as energy needs an in and an out. If you're standing on a field, and there is torrential downpour and lightning, and the lightning hits the fence, everybody that's holding hands, that lightning is going to go through each and every one of them until the last fucker, who is the out."*
>
> - MILA VELAZQUEZ

## HOW MILA CONNECTS

**MILA'S APPROACH**

"When I connect to someone, I don't take on their proxy. I connect to their higher self in the quantum field. I do it a little bit differently because I don't want myself to be testing for someone else all day long. It's a lot of energy to take on. Instead, I use my own intuition. And I hook up so the same information comes down to both of us."

*Notes on proxy testing:*

SECTION 06

# Entity Protection & Energy Flow

*Connecting to only your higher self - and no other entity or being*

**WORKSHOP QUESTION: "HOW CAN WE BE SURE THERE ISN'T ANOTHER BEING OR ENTITY INFLUENCING THE YES OR NO?"**

"When you connect to your higher self, at the beginning, you say who you're connecting to. You're connecting to your higher self. As a spiritual practice, you put a protection on yourself before you even start anything, before you even start the day. The intention is that you're connecting to only your higher self and no other entity or being. All the entities and beings are out of your energy field. If you have an entity that's in your energy field, then that entity needs to be expelled because your intuition will be wrong."

**ON ENTITIES**

"There are different types of entities. There's disincarnates, there's all kinds of different spirits around you. If an entity is high level and you have an entity inside of you, then you need to release that entity. There are different ways to release it, depending on your beliefs. Everybody has a different job when it comes to releasing entities. Some people are able to release some entities. Other people, they don't deal with entities at all."

> *"If you're in love and light, you don't get these entities. The most important is not to be afraid."*
>
> - MILA VELAZQUEZ

## CROWN CHAKRA AND ENERGY FLOW

Mila has strong opinions on getting the flow of energy right. Here's what she teaches about the chakras:

"Everybody needs their chakras opened. That's your energy centres. If your chakras are not open, your energy centres are not flowing. You have an imbalance in your body. It all starts with the flow of your energy centres. That means your crown is flowing, your third eye is open, your throat is open, your heart is on both sides - not just on one, but in front and the back."

"I don't believe that it closes. I just believe that it doesn't flow correctly. If it's closed, you're dead. But you could have like a bottle stopper on it. Not everybody can get that flow going by themselves. Some people need others to help them."

"When that crown is open and going, that information just comes in. It just pours in all the time."

*What do I want to explore further about energy protection?*

SECTION 07

# Stories from Mila's Practice

*Real examples of manual muscle testing in action*

### LEO THE DOG

When Mila took Leo to the vet and got bad news, she sat in the car while they did the ultrasound. She aligned, connected to her higher self, connected to Leo's higher self, and asked him directly:

> "Are you dying?" He said yes. "Can you benefit from this surgery?" He said no. "Is there something I can do to get you better?" He said no. "Is it for your highest and greatest good to leave you alone?" Yes. "Is it for your highest and greatest good to go home?" Yes. "You want to go home?" Yes.
>
> The doctor wanted to open him up, but Mila knew from his file he had an inflammatory bowel and couldn't have anti-inflammatories or antibiotics. She was on the third floor with no elevator. "You're going to open him up and then do what with him? He's 10 years old."
>
> She changed his diet using manual muscle testing - "How about some turkey?" He said yes. "How about we boil everything to boil out all that fat?" He said good idea. She asked which supplements he needed and went with whatever he said.
>
> "The doctor said to me, he's not going to live past two, Mila. He's a really sick dog. And I said, stop right there. And look, he's almost 10 years old. Yes, he's been a sick dog. But a happy and a healthy one at that."

### THE HIGH SCHOOL FRIEND

Mila shares a personal example about trusting answers even when they seem wrong at first:

> "I had a friend in high school. I was 15 and he was 16. And then years later, in my 40s, I met him again. And I asked, is it for love? And I got a yes. And I was like, oh my God, it's for love. I got to pay attention."
>
> "As time went on, I realized this isn't for love. But he was supposed to introduce me to one of my mentors, one of my teachers. If I would have gotten no, he's not for love, I wouldn't have paid attention. I would have been like, okay, see you, bye. But because I got yes, I paid attention. And gratefully that I did."
>
> "Sometimes you have to believe in yourself that the answers that you get to your questions, that it is correct at that time. At that moment in time."

*A time when my gut feeling turned out to be right - even if it didn't make sense at first:*

SECTION 08

# Troubleshooting & Building Intuition

*When it's not working, what to check - and what manual muscle testing is really for*

## WHEN YOU GET THE SAME RESPONSE FOR TRUE AND FALSE

A workshop attendee asked this exact question. Mila's answer:

**You might not be fully connected**

Maybe you're not fully connected to your higher self or grounded in. Go back to your sacred space.

**You might be thirsty**

"Or you're thirsty. It's hard to do." Drink water. This fixes more problems than people think.

**Create your sacred space**

"Light a candle, smudge, clear the energy around you. You can't have other people running around in the other room screaming."

**It takes practice**

"Don't forget when it's new, you have to practice. You're going to make sometimes wrong answers. This is why you're double checking."

## WHAT MANUAL MUSCLE TESTING IS NOT FOR

"Manual muscle testing is not meant to know the future. Will I get married to this gorgeous guy in a year? He's loaded with a lot of money? Yeah, sure." - Use it for guidance and clarity, not fortune-telling.

## WHAT IT IS FOR

### FINDING BALANCE AND CLARITY

"Using the manual muscle testing on yourself can give you a little bit of balance, a little bit of clarity. It gives you the ability to have a conversation with your higher self that knows everything, your subconscious mind, your memory. It helps you dig through some of the issues that you might have to find some issues."

### INTUITION IS THE REAL DESTINATION

"It's using your intuition. It's closing down your logical reasoning, left-sided space and time brain. And it's accessing that right side of your brain, where your intuition lives, where your creativity lives, where your languages live. It's innately inside of you. Intuition is subtle. It doesn't smack you in the face."

*When I get stuck or confused testing, I will:*

PRACTICE LOG

# Track Your Testing

*Keep practising - and do it for yourself and for your loved ones*

Use this log to track your practice. Even one question a day builds the connection. Note which method you used and whether it felt clear.

ABOUT MILA

## Mila Velazquez

MSPT | MILA'S HEALING TOUCH

Mila is an intuitive energy healer and retired Physical Therapist who uses manual muscle testing combined with multiple modalities to help people find and release what's holding them back. She brings together everything she knows and makes it her own.

She uses the physical and the metaphysical in order to heal. She works with clients 1:1 - connecting to their higher self in the quantum field, asking the questions, and using her intuition to find the issues that need attention. Her strongest clair is claircognizance: she knows what she knows and doesn't know why she knows it.

She teaches workshops, works with people and their animals, and brings a direct, no-nonsense warmth to everything she does.

> *"Keep practising. And trust yourself. What you get is what you get."*
